

HD/SD NLE

HARRIS LEITCH VELOCITYHD

The latest version of the post-production HD/SD NLE includes support for the HDV high-definition format and variable frame-rate processing for content from Panasonic's AJ-HDC27 VariCam camcorder and expanded IEEE-1394 I/O support; delivers full-quality, real-time HD playback and editing of multiple video and dynamic graphics streams.

CONTENT DELIVERY PLATFORM

HARRIS H-CLASS CONTENT DELIVERY PLATFORM

Offers platform-based advantages, including content management and sharing, intra-application messaging, increased security and scheduling functionality; management of content assets, associated metadata and content relationships enables the delivery of rich media across multiple distribution channels.

ATSC TRANSMITTER

HARRIS PLATINUM

Complete with an integrated Harris eCDi enhanced network control and monitoring system in a PowerCD transmitter; allows the transmitter to be added to a TV station's modern network infrastructure, such as a facility-wide SNMP network, without the need for an external box; the cabinet also houses a Harris Apex exciter and transmitter control; designed for simple field upgrades; users can implement analog-to-digital upgrades in the field by simply swapping out the older control cabinet.

TEST AND MEASUREMENT CONSOLE

HARRIS VIDEOTEK VTM SERIES

The fully customizable, multiformat, multifunction test and measurement consoles enable users to pick from a list of video and audio options to create the ideal precision test instrument for their specific environment; features 1RU chassis, tactile-feel lit controls and intuitive navigation; outputs to any VGA monitor with a Videotek Q-See customizable display.

NETWORK MANAGEMENT SYSTEM

HARRIS NETBOSS

Allows broadcasters to monitor and configure STL links through one graphical user interface; the cross-platform element management option supports distributed network architectures and provides complete, real-time management for the Harris Video Networking and Microwave Solution.

VIDEO NETWORKING

HARRIS NETVX

Designed to provide improved bandwidth efficiency for increased multichannel operations, enhanced HD services, disaster recovery, event support, remote newsgathering and IP-based video transport; leverages packet switching providing bi-directional transport over ATM, IP, DS-3, fiber (OC-3), satellite and microwave networks; supports triple-play services, all in one chassis.

MASTER CONTROL AND BRANDING

HARRIS ICON SUITE

The SD/HD master control and branding products include IconMaster, IconStation and IconLogo; based on the Leitch NEO modular platform, IconMaster combines critical master control functions with multilayer integrated branding and can be used with other advanced applications to create a plug-and-play system all in the same frame; IconStation combines logo insertion with multiple real-time data-fed crawls and a squeezeback DVE; NEO-based IconLogo offers modular branding for such applications as time and temperature, stills and animations, audio clip playback, and text crawls for breaking news.
